SUMMARY

Product Designer with 7+ years of experience across enterprise software, healthcare, SaaS, and consumer products. Designs AI-assisted experiences, complex workflows, and accessible interfaces from discovery through delivery. Combines research, interaction design, prototyping, and design systems expertise with close product and engineering collaboration to simplify complexity and drive measurable outcomes.

EXPERIENCE

Adobe | San Jose, CA **Sep 2026 - Present**
Product Designer

- Design AI-powered, human-in-the-loop experiences, translating generative AI capabilities into intuitive interactions that balance intelligent automation, transparency, and user control.
- Drive end-to-end product design for enterprise applications, translating ambiguous requirements into clear interaction models, streamlined workflows, and high-fidelity experiences.
- Leverage Adobe Spectrum 2 Design System to create consistent, accessible interfaces using reusable components, design tokens, and established interaction patterns.
- Develop high-fidelity prototypes and interaction specifications in Figma, communicate complex product behaviors, and validate design decisions with cross-functional teams.
- Collaborate with product managers, engineers, and researchers to evaluate design trade-offs, address technical constraints, and shape product experiences from concept through implementation.

Blue Cross Blue Shield | Chicago, IL **Aug 2024 - Aug 2026**
UX Engineer

- Led redesign of the Care Coordination Portal, simplifying clinical and operational workflows and improving user satisfaction by 39%.
- Scaled the Cobalt Design System across 11+ enterprise applications, reducing design-to-development handoff time by 40%.
- Used research and stakeholder feedback to identify workflow bottlenecks and improve task completion rates by 20%.
- Helped evolve the legacy portal into CareCoordination360, designing unified member-centric workflows across clinical, pharmacy, and referral data.
- Facilitated cross-functional discovery workshops, improving alignment and reducing design iterations by 30%.
- Partnered with Blazor engineering teams on responsive UI specifications, interactive prototypes, and QA/UAT validation.

RoomBees | Dallas, TX **Jun 2024 - Dec 2025**
Head of Design

- Led 0-to-1 design of a roommate and housing discovery platform across web and mobile, supporting 250+ active users.
- Defined core experiences for roommate matching, onboarding, housing discovery, and user profiles from research through launch.
- Built a reusable Figma component system and interaction patterns to support product consistency and rapid iteration.
- Conducted interviews, surveys, and usability tests; collaborated with engineering to prioritize and validate new features.

Transition Discoveries | Harrisburg, PA **Feb 2024 - Aug 2024**
Lead Product Designer

- Led an inclusive website redesign for youth with disabilities, aligning research, UX strategy, and high-fidelity

design with accessibility needs.
- Reworked critical interfaces, reducing user errors by 50% and improving task success rates by 67.22%.
- Used user research and testing to shape 25+ prototypes and improve accessibility audit scores by 25%.

Ampcus Inc (DC Water) | Chantilly, VA **May 2023 - Feb 2024**

Lead Product Designer

- Redesigned enterprise utility workflows, including the Fire Hydrant module, reducing response times by 25%.
- Used analytics, usability tests, and A/B experiments to improve task completion by 30% and reduce bounce rate by 15%.
- Created accessible UI patterns and implementation-ready designs for Blazor-based applications, improving collaboration with engineering.

Indiana University - Luddy School | Indianapolis, IN **Aug 2022 - May 2023**

User Experience & Communication Specialist

- Redesigned Canvas experiences, increasing student engagement by 25% and reducing bounce rate by 19%.
- Designed communications for 4,500+ students and contributed to conversational support experiences using Mainstay.
- Integrated conversational experiences using Mainstay, enhancing the efficiency of academic support chatbots and improving student interaction by 20%

Reached Technologies & IT Consulting | Hyderabad, India **Apr 2020 - Apr 2022**

User Experience Designer

- Led research and iterative UX design for EV Pitstop, using surveys, competitive analysis, walkthroughs, and usability testing.
- Improved EV app information architecture and task flows; reported 97% task completion and 50% fewer support tickets.
- Collaborated on the design and implementation of Blazor-based web applications, creating wireframes, interaction flows, and UI specifications that reduced rework and accelerated development cycles.
- Presented research-backed presentations to executives and stakeholders, influencing design decisions with data-driven insights

---

EDUCATION

Indiana University - Indianapolis

Master's, Human-Computer Interaction, Indianapolis **GPA: 3.8**

- 1st Place, Indy Parks & Recreation Design Sprint, competing against 16 teams.
- Best in Show, Graduate Capstone, competing against 32 teams.

Jawaharlal Nehru Technological University - Hyderabad

B.Tech, Computer Science Engineering, Hyderabad **GPA: 3.5**

SKILLS

- **Product & Interaction Design:** End-to-end UX, Product Strategy, Information Architecture, User Journeys, Interaction Design, Prototyping, Design Systems
- **Research & Measurement:** User Interviews, Usability Testing, Surveys, A/B Testing, UX Analytics, Accessibility (WCAG), Heuristic Evaluation
- **AI & Platforms:** Human-AI Interaction, AI-Assisted Workflows, Generative AI UX, Conversational AI, Enterprise SaaS, Web and Mobile
- **Tools & Technology:** Figma, Adobe Creative Cloud, ProtoPie, HTML/CSS, JavaScript, Blazor, SQL
